Practice Labs

Microsoft

Practice Labs gives you the ability to configure a wide range of technologies in a safe environment using just your browser.
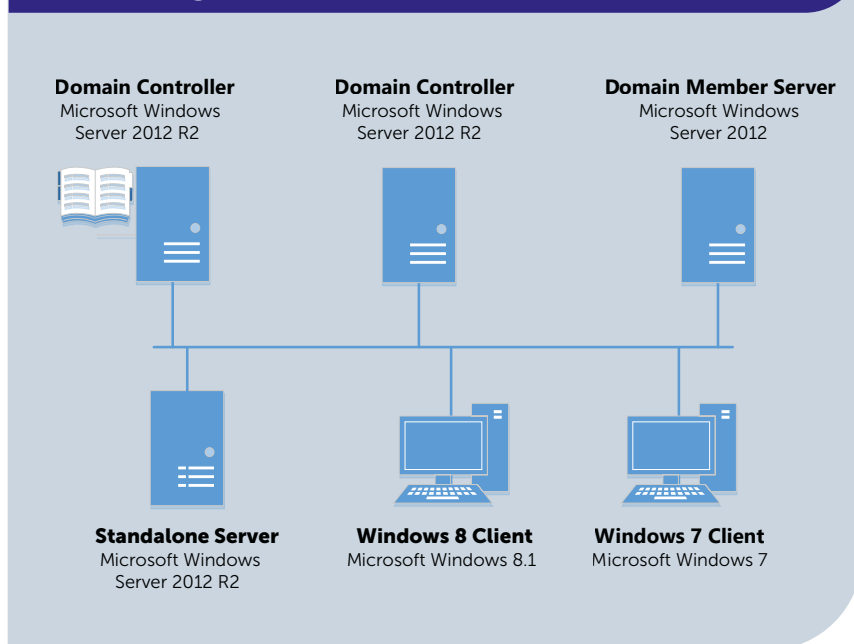

With our Practice Labs for Microsoft we cover a range of operating system versions and enterprise software. These include Microsoft Windows Server (2008 R2, 2012 R2), Microsoft Windows Desktop (8.1, 7) and applications like Microsoft Exchange Server 2013, Microsoft SQL Server 2012 and Microsoft System Centre 2012. The associated lab guides cover exam and real world scenarios for each of these technologies which are carried out on real equipment.

1   Microsoft Lab Hardware

Our hosted Microsoft platform is configured to imitate real world configurations by providing sufficient hardware not only to carry out tasks but also test the impact of those changes. From the browser you gain administrative access to the desktop of each server giving you complete control to carry out either your own configurations, or follow the lab guides to configure specific technologies that are required for the relevant Microsoft exams.
